## **FLOURISHING FLOWER BORDERS**

In 2007, although I thought my Flower Borders were doing reasonably well, I did think that they were capable of putting on a better show of flowers.

When I discovered my local grocery store “E Fowlie & Co” in Tarland, stocked this soil remineraliser, SEER Rockdust, I decided to try it. As per the instructions on the bag, in February 2008, I gave it a surface dressing of 0.5kg per square metre.

As shown by the photograph below I am pleased to say that the results in 2008 speak for themselves.

The soil is reasonably good as it was previously agricultural grass land. Whilst the garden would probably have developed further this year in any case, with no additional mulching or fertiliser, I have to say SEER Rockdust has produced better than expected results.
