ROSE CHAMPION ALLOTMENT SUCCESS

Having read about SEER Rockdust success I decided to give it a go in my allotment this year and I am now both surprised and pleased with the results.

I have run this allotment for 12 years and I can honestly say that this year I have produced the best crop of **POTATOES** ever – yes, the only difference has been the use of SEER Rockdust.

I can also report that my run of the mill **GLADIOLI** have grown into a prize standard crop and my **DAHLIAS** have put on a brilliant show. As you will see from the photographs the **ONIONS** are also doing exceptionally well.

Yes, I am well impressed with SEER Rockdust and I will be using it with my competition roses in 2009!
