TASTIER STRAWBERRIES

It was fine to meet you at the SEER Centre last weekend for your Harvest Festival. We think it is amazing that you grow such a variety of healthy crops in such a wild and beautiful location. Having the red deer stags roaring in the moors so near by says it all for us.

We have grown vegetables here for 7 years. Last year we raked the SEER Rockdust in as advised and I can honestly say we have had the best growing season ever.

It has been a good summer but this could not have accounted for the improvement in yield and flavour of our LEEKS, CORN, PUMPKIN, TURNIPS and most of all, the STRAWBERRIES.

It is perhaps the difference in the taste of the strawberries that was most exceptional – they were so much more tasty than the shop strawberries you would almost think they were a different fruit.

Yes, we did become very popular with the neighbours who were always looking for a share of our vegetables and fruit. We got quite used to complete strangers walking past and stopping and pointing to each other about our garden.

We have no doubt SEER Rockdust is very special. Good luck with your promotions – we will be back for more!.

Kind regards
Robert and Liz Leiper
