

# Lawn Sand

Our Lawn Sands are the finest on the market. Using specially graded and dried sand we blend in the Nitrogen (N) and Iron (Fe) using high quality products from the UK and Europe.

- **Spread more easily**
- **Are less moist**
- **Contain more Fe than most of our competitors**
- **Lower application rates than many of our competitors**
- **More economical to use**
- **Less handling**
- **More effective than others**

Choice of formulations and we can manufacture bespoke products, adding other nutrients where required.

<b>Lawn Sand, High Iron</b>	<b>3 - 0 - 0 + 7% Fe</b>		
Rate of Application:	60g/m <sup>2</sup>	25kg bag treats:	416m <sup>2</sup>
<i>NB: Some of our competitors say their lawn sand contains 7% Fe, however some of these have been found to contain 7% Ferrous Sulphate, which is equal to approx. 1.4% Fe – you have been warned!</i>			

<b>Lawn Sand</b>	<b>3 - 0 - 0 + 3% Fe</b>		
Rate of Application:	120g/m <sup>2</sup>		
25kg bag treats	178m <sup>2</sup>		

**NB: Products containing iron sulphate will stain hard surfaces and are damaging to moss.**
