BioActive MolTurf®

Naturally sourced carbohydrates and trace elements that energise the turf grass plant metabolism and stimulate microbial activity around the root and leaves.

Application rates:

When used on its own: 20–30 litres/ha diluted in 500–600 litres of water.
When tank-mixed: 10–20 litres/ha diluted in 300–400 litres of water when tank-mixed with Angus BioActive Seaweed.

Apply every 2–3 weeks during March and April and before the first fertiliser application, and during September and October after autumn renovations. Apply once per month during summer and winter months.

Keep the product in the original container in a cool, dry place, out of direct sunlight and out of the reach of children. Do not expose the product to temperatures above 35 °C.

Recommended shelf-life is 2 years.

SHAKE WELL BEFORE USE. STORE UPRIGHT.

SOIL IMPROVER 1.1–0–5.7

Total nitrogen (N)	1.1 %
Total phosphorus pentoxide (P_2O_5)	0 %
Total potassium oxide (K_2O)	5.7 % (4.7 % K)
Water-soluble K_2O	5.7 % (4.7 % K)
Organic matter	59 %
